

## Overview

The 6 Compartment Stacking Flex Trays is made from flexible silicone, so it can't be splintered or sharpened into a weapon. These trays retain heat as well as other trays with a similar layout. These six compartment flexible trays are designed for high security use in segregation units, suicide watch cells, mental wards, and general population living areas in a correctional or mental health facility. They can be transported with insulated carriers or heated cabinets for delivery to remote sites, work camps, distant living areas and cell blocks. The natural flexibility of silicone prevents it from being sharpened into a weapon. Silicone will not chip, crack and cannot be broken, designed to stand up to inmate abuse, hot ovens and harsh chemicals in dish machines. Silicone is naturally non-stick. With no cracks or crevices in the design, the tray is easy to clean regardless of the cleaning method.

- Six-compartment stacking flex tray
- Durable, flexible silicone construction
- Heat retention comparable to similar insulated trays
- Stacks just like competitive trays with the same layout
- Has (1) 22 oz, (1) 18 oz, (1) flatware, and (3) 11 oz compartments
- Projected 10 year lifespan
- Dimensions: 9-13/16"W x 13-3/4"L x 1-9/16"D

Attributes		
Color	Brick Red, Brown	
Packed	10/Cs
