

Overview

The Cuff Clip is a convenient, efficient, and safe way to carry as many as 13 pairs of handcuffs. The cuff clip is designed to be worn with a standard size 2.25" duty belt and consists of a heavy duty nickel plated steel main spring welded to a pair of belt loops. Handcuffs are easily carried and can be quickly and efficiently accessed with one hand. It allows an officer to keep one hand free and removes the opportunity for a prisoner to gain access to unrestrained handcuffs.
