

Overview

Protect your eyes with these general purpose safety goggles! Boasting a scratch-resistant design, these flexible goggles provide clear vision no matter what the task. While they are great for protecting eyes from dust, dirt, and grime, they also create a splash shield, making them perfect for use when handling chemicals and cleaners.

Made with a clear polycarbonate, single-lens, this pair of goggles features an elastic strap to accommodate individual facial contours. Plus, they are large enough to slide over prescription glasses and comfortably fit most users.
