

Overview

The KSG Shooting glove is modeled after the Hatch® Flight glove but with a 4 inch shorter cuff. It is a very lightweight, comfortable shooting glove designed for use in SWAT and tactical operations. It features a form-fitting design and thin, yet durable leather palms, which provide excellent tactility, dexterity, and grip for high-performance shooting. The Kevlar® back of hand offers inherent flame resistance. The short, open cuffs allow easy pull-on and removal.

WARNING: Flame-resistant fabric is not fireproof. Cut-resistant fabric is not cut-proof. Cut & flame-resistance is an inherent property of the para-aramid material used on the inner palm lining, back of hand & thumb. Resistant claims do not provide a definitive statement on the expected performance in real-world applications. Use common sense and exercise caution when encountering potential hazards.
