

## Overview

This matte white magnetic cell window cover roll is a flexible, cut-to-fit solution designed to improve inmate privacy while maintaining staff safety and visibility. Supplied in roll form, the material can be cut to size, allowing facilities to create multiple custom window covers from a single roll to fit various cell window dimensions.

Cell windows allow inmates to observe officers performing daily duties and other inmates outside the cell, which can sometimes lead to disruptive or violent behavior. Developed with input from correctional professionals, this solution obstructs the inmate's outward view while still allowing staff to quickly monitor inmate activity when needed.

The cover is installed outside the cell using a powerful magnetic backing, making it tamper-resistant and easy to apply or remove depending on operational needs. This makes it especially effective for suicide watch, de-escalation situations, and routine housing management.

Finished in matte white, the material provides a clean, neutral appearance suitable for correctional environments while preserving safety, control, and flexibility.

- Color: White
- Size: 24.375"x25' .030"
- Matte white magnetic material for a clean, professional appearance
- Roll format – cut to fit custom window sizes
- One roll can be cut into multiple window covers
- Magnetic attachment securely grips metal door frames
- Easy up / easy down for quick changes as needs arise
- Tamper-proof design when placed outside the cell
- Helps reduce inmate agitation by limiting outward visibility
- Allows staff to maintain control and safety, especially during emergencies
- Suitable for suicide watch and special housing situations
- Designed to fit most standard correctional cell windows
