

Overview

Built to withstand the toughest institutional demands, the **Charm-Tex Solid Color Inmate Jumpsuit** is the proven uniform of choice for correctional and detention facilities nationwide. Designed for **strength, comfort, and compliance**, each jumpsuit is crafted from **7.5 oz. heavyweight 65% polyester / 35% combed cotton industrial-grade twill fabric** — durable enough to endure countless industrial wash and dry cycles without fading or tearing.

Unmatched Durability & Fabric Performance

The fabric dye meets **ASTM wash-fastness standard 4 (out of 5)** for color and stain retention and is fully chlorine-resistant. Every seam is **triple-needle stitched** and reinforced using **bonded dual-active T-40 D-Core thread**, allowing the garment to stretch — not split — under pressure. The **cleanly finished, double-folded hems** ensure long life and a consistently neat appearance.

Comfort & Secure Design

A **special heat-resistant elastic back** made from 1½" woven 26-gauge rubber elastic provides flexibility and comfort that lasts through hundreds of high-temperature wash cycles without loss of elasticity. The **generous full-cut pattern** fits a wide range of body types, providing ease of movement and professional uniform consistency across facility populations.

Functional Security Features

To support facility safety standards, the design includes **one double-stitched breast pocket** and **no side or rear pockets**, reducing the risk of contraband concealment and simplifying security checks. The **six-snap front closure** uses premium, **laundry-proof size 24 ligne solid brass, nickel-plated snaps** that will not rust or break — a superior alternative to zippers or cheaper metal fasteners.

Reinforced for Longevity

Every stress point — including the crotch, breast pocket, and seams — is **bartacked and reinforced** for maximum service life. Lapels extend to the raglan sleeve seam and are securely bartacked for stability and appearance. The standard **32" finished inseam** accommodates most facility populations.

Identification & Ease of Distribution

Each jumpsuit includes a **woven color-coded size label (2½" × 1½")** sewn into the collar, providing fast and reliable size identification during laundry and issue. These labels are **laundry-proof and fade-resistant** to maintain readability throughout the garment's lifespan.
