

Overview

Peerless waist chains are designed for secure restraint and controlled movement during inmate transport or handling. Each model features two handcuffs positioned at the hips, allowing for either a parallel-arm or cross-arm handcuffing technique. Built from special heat-treated steel, these durable waist chains provide reliable security in correctional and law enforcement settings.

Available options include:

- **Standard Model** – Standard Handcuff with 54" chain.
- **Oversized (54")** – Includes oversized handcuffs with a 54" adjustable chain, suitable for larger wrist sizes.
- **Standard Model (72")** – Combines standard handcuffs with a longer 72" chain for added flexibility and fit range.

All versions include two standard handcuff keys and are designed for maximum strength, durability, and security.
