

Overview

The Cinch-Up seal which is a self-locking pull tight security seal that features an ultrasonically sealed tamper-proof cap to protect zippered bags. The cap is easy to apply and can be removed by twisting it off. Adjustable security seals designed to be used on any bag requiring a highly tamper-resistant locking mechanism and a reasonable degree of strength. They come in a variety of colors for easy identification and are consecutively numbered. The numbers are molded within the tab with white or black stamping (depending on the color of the seal).
